If you play it regularly you can make a "Team Build" that is shared between several players, which can become very competitive. But I've used the game twice. Once to practice developing an AI I was simulating, and once to play a very simple Star Trek, Galaxy Quest style game for people on the holodeck. Each time I played, I found it quite fun. It's not the first time I've played it though; I once used the scenario editor and made a set of scenarios to use for training purposes. I did a lot of work with that, and you can see some of my work on The Age of Stars. The engine is a decent piece of software, and the faction system is interesting. The game has good production values, and the scenario editor has a built-in screenshot feature. There are a fair number of scenarios you can download for free as well, which is also a nice thing. I'd recommend it if you want a decent game

with a nice engine. 0 Author Message JossScott Posts : 55 Subject: Re: The age of stars/AOS 3.0 beta 1.5 Tue Jan 25, 2017
