It sports a really intuitive and lightweight graphical interface that displays lots of features at hand and some tips that you can check out. Zafi.D Remover will find the virus in your system, deactivate it and restore parameters necessary for the correct functioning of your computer. Remove Zafi.D worm from your PC Zafi.D is a mass-mailing worm that targets certain versions of Microsoft Windows. The worm sends itself to e-mail addresses that it finds on an infected machine. The worm is activated when a user opens the e-mail attachment that contains the worm. Your computer may be infected with Zafi.D if you notice e-mails with a certain appearance, certain error messages, or certain file names on the infected computer. It distributes copies of its worm code in an e-mail file attachment. Unlike the first Zafi.A variant, Zafi.D uses e-mail messages that are in English, Italian, Spanish, Russian, Swedish and several other languages. More features and tools The application scans your computer and automatically removes infected files, so that they won't bother you again or pose a threat on your personal information. It's recommended that you perform a periodic scan on your computer, as to detect any new infections. All in all, Zafi.D Remover is a lightweight and neat application that helps you remove Zafi.D worm and all associated files from your computer. Unblock Internet. Proxy. Or. Blocking. Blocker.
